SUMMARY

Front-End Developer with hands-on experience in building responsive web and mobile applications using React.js, React Native, TypeScript, and Redux Toolkit. Skilled in UI design, API integration, and state management. Passionate about delivering scalable, user-friendly, and high-performance interfaces. Strong problem-solving mindset and a proven ability to collaborate in Agile environments.

WORK EXPERIENCE

Front-End Developer-Intern, Actify inc   July 2025 -August 2025

Actify Business CRM: ViewWork
- Enhanced mobile app with contact management, lead tracking, and direct communication via calls, emails, and WhatsApp.
- Implemented lead conversion, reminders, and performance visualization; synchronized data with Actify CRM Web App.

Actify HRMS: View Work
- Enhanced role-based HRMS mobile app with attendance tracking, leave management, and employee daily work logs.
- Streamlined admin leave approvals, expanded real-time API integration, and delivered a scalable, secure, user-friendly mobile solution.

PROJECTS

Employee Management System   Live Preview

Tools: React.js, Redux Toolkit, ShadCN UI Library, JSON Server.
- Developed a full-stack EMS website to streamline HR operations with role-based authentication.
- Enabled employees to mark attendance, apply for leaves, and view their active data in real time.
- Built admin features to add new accounts, update employee roles, and manage departments efficiently.
- Integrated REST APIs for accurate data handling and designed a clean, responsive, and user-friendly UI for both employees and administrators.

Fitness App   Download Mobile APK

Tools: React Native, Expo, JSON Server
- Created a cross-platform fitness app with interactive dashboards categorized by body parts.
- Designed detailed exercise screens featuring GIF demonstrations and step-by-step instructions.
- Added features such as workout tracking, favorites list, and a search bar for quick exercise access.

Weather App Live Preview

Tools: React.js, Weather APIs
- Built an interactive weather dashboard that allows users to select a country and city to view real-time weather updates.
- Implemented dark/light theme toggle for better accessibility and UI personalization.
- Integrated weather APIs for accurate and dynamic data visualization.

Task & Note App Live Preview

Tools: React.js, LocalStorage
- Developed a productivity app that lets users add, view, edit, and delete categorized tasks.
- Designed a simple and intuitive interface for easy task navigation and management.
- Used LocalStorage to securely store data for offline persistence and reliability.

SKILLS

Technologies: React.js, ReactNative, TypeScript, ReduxToolkit, zustand,Tailwind, ShadCnUI library, HTML/CSS, JavaScript

Soft Skills: Problem-solving, creativity, attention to detail, collaboration, communication, adaptability, and time management.
